**(IC Committee Remarks-** It had been noticed by us during our inspection to the school that room sized mentioned in the application for affiliation to secondary level by the school is unmatched to the actual size of the class room. Accordingly questions were raised to the school management and it was learnt that they have filled the size of room in application form in **sq feet** whereas it was supposed to be filled in **sq mt** as per affiliation rule. Here, we are to certify that above mentioned size of rooms are actual and correct and physically verified by us. – IC Members)
